Find apps, content, and more.

Home

Welcome home

Observability

Consolidate your logs, metrics, application traces, and system availability with purpose-built UIs.

Security

Prevent, collect, detect, and respond to threats for unified protection across your infrastructure.

Explore, visualize, and analyze your data using a powerful suite of analytical tools and applications.

Get started by adding integrations

To start working with your data, use one of our many ingest options. Collect data from an app or service, or upload a file. If you're not ready to use your own data, play with a sample data set.

Add integrations

Try sample data

Upload a file

Management

Dev Tools

Stack Management

Manage permissions

Control who has access and

Monitor the stack

Track the real-time health and

Back up and restore

Save snapshots to a backup

Manage index lifecycles

Define lifecycle policies to
